

High performance

pasture seed

SSR 729

Rye | Rog

- Winter type forage rye used extensively throughout South Africa
- Widely adapted to most soils conditions and prefers sufficient rainfall
- Suited for grazing as well as baling
- Winter tipe weidingsrogkultivar wat ekstensief regdeur Suid-Afrika verbou word
- Wyd aangepas in 'n wye reeks grondtipes en verkies voldoende reënval
- Geskik vir weiding en baal

Cultivar characteristics | Kultivareienskappe

Grain Yield	Average Gemiddeld	Graanopbrengs
Hectolitre Mass	Average Gemiddeld	Hektolitermassa
Lodging Tolerance	Average Gemiddeld	Staanvermoë
Plant height (cm)	100+	Strooilengte (cm)
Purpose	Grazing & Baling Weiding & Baal	Doel

Seeding Density | Saaidigtheid

Area	Kg/Ha	Area
Rainfed	25 - 50	Droëland
Irrigation	75 - 100	Besproeiing
